ACTIVITIES

GARMIN EPIC TRAIL FAMILY

In 2025, the Garmin Mountain Festival is introducing a new concept for children's races: the Garmin Family Race, a unique experience in which parents and children compete together on an exciting obstacle relay course.

The race is designed for adults and children to work as a team and share the excitement of the sport. Each team will be made up of one adult and one child or 3 people in the U13 category (1 child + 2 adults or 2 children + 1 adult), and together they must complete a circuit adapted to the child's age.

The age of the participants is established until December 31 of the year of the test.

ATTENTION!

Depending on the number of places available, you can register in person up to 15 minutes before each session.

INITIATION NORDIC WALKING

We propose 3 activities guided by experienced instructors that will help you learn about and practice this sport, with the aim of having a training session on Saturday and a practice session on Sunday.

The Club d'Esports de Muntanya Cerdanyola organizes the activity with the aim of promoting the practice of sport in the mountains with values and promoting respect for nature and helping to preserve it.

HOW TO GET THERE

INTRODUCTION TO ORIENTATION

Ideal activity for the whole family. Map and compass orientation is an essential skill for those who enjoy outdoor activities, such as hiking, trekking or simply exploring unfamiliar areas.

MEETING POINT

YOGA

Yoga is an ancient discipline that combines physical postures, breathing techniques and meditation to promote the overall well-being of the individual. When practiced outdoors, specifically in places as magical as the Boí Valley, the benefits are multiplied, fusing the physical and mental advantages of yoga with the therapeutic gifts of nature.

MOUNTAIN CINEMA

DAY: Friday, 26th June
HOOR: 20:30h
LOCATION: Village zone
DURATION: 35 minutes

[▶ VIEW TRAILER](#)

In the heart of the Jordanian desert, a group of seven friends -climbers and mountain guides- venture into one of the most spectacular and remote landscapes on the planet: Wadi Rum. Over the course of 25 days, they will tackle and explore the vast rocky labyrinth that has captivated adventurers from all over the world.

The desert, famous for its imposing rock formations and vast expanses of sand, will be the setting in which these brave climbers will not only tackle some of the most demanding rock faces, but also open up new climbing routes that will go down in the history of this unique corner of the Earth.

'Wadi Rum - Tradclimbing' is not just a story about climbing; it is a window into daily life in this remote and ancient landscape. The friends not only compete against nature and their own fears, but also immerse themselves in the local culture, spending time with Bedouin communities and learning about their traditions and customs.

Through their eyes, the viewer will witness not only a passion for climbing and exploration, but also a deep respect for an ecosystem and a culture that have stood the test of time. 'Wadi Rum - TradClimbing' is an invitation to experience an epic adventure whilst discovering the magic and mystery of Wadi Rum.

NATURAL ENVIRONMENT

HELP US COLLECT WASTE RESPONSIBLY

The National Park of Aigüestortes and Estany de Sant Maurici is located in one of the most privileged areas of the Pyrenees mountain range. Its surface area of more than 40,000 hectares is divided between four counties that have a rich natural and cultural heritage: Alta Ribagorça, Pallars Sobirà, Pallars Jussà and Val d'Aran. The Park is included in the Spanish National Parks Network and is the only one of its kind in Catalonia. Its valleys, surrounded by peaks more than 3,000 m high, treasure a magnificent representation of all the elements that characterize the high Pyrenees, both in its geological formations and in its flora and fauna. Water is perhaps the most characteristic element of the Park, whether in the form of snow, rivers, waterfalls or being part of the more than 200 lakes that are spread over its geography and that give this natural space of special protection a character unique and unrepeatable.

The Park receives more than half a million visitors each year: one of its main objectives is to make people's access compatible with the complete conservation of all its natural values. This goal is impossible to achieve without the effective involvement of all its visitors. For this reason, we ask for your cooperation and respect for the established protection regulations.

For this reason, remember that: For more information on the good environmental practices they must respect during the warm-up and the competition, visit the Good Practices Manual (FEDME)

ECO-RESPONSABILITY

Do not leave rubbish in nature, use the available containers, respect the flora and fauna, and strictly follow the marked route without using shortcuts. The organization will use, whenever possible, reusable or recyclable material and will proceed to selective collection (batteries, paper, plastic, etc.). The marking of the route, carried out on foot, will be collected on the same day. The course will be cleaned immediately after the last runner. Communication on paper will be reduced to a minimum, prioritizing electronic support.
